DATE OF INFO [REDACTED]

SUPPLEMENT TO  
REPORT NO.

25X1X

[REDACTED]

25X1C

[REDACTED]

25X1X

1. [REDACTED] the Buna Plant is to be expanded in 1949. About a million marks will be required for the purchase of the carbide furnaces under construction. The first furnace was said to have been shipped to the plant by the middle of May. Considerable funds were provided for the development of the following new products:

a. A new kind of lacquer solvent; raw materials for film components; monochloroacetic acid.

b. A new filling agent for buna. As a carbon black substitute it was meant to meet the present shortage of carbon black and serve in the manufacture of colored buna products.

c. A new washing agent for industrial purposes; transparent polystyrol.;

A 15 percent increase in the total 1949 production was expected to be achieved through these measures.

25X1X

[REDACTED]

25X1C

2. a. The main products of the Buna Plant were buna and iscelit. b. By-products were acetic acid, high-percentage spirits, soap products (green soap) etc.

(1) Carbide, the basic material for buna, was produced in the plant itself. A lactiform, viscous mass (latex) passed through a drying kiln in workshop I47. [REDACTED] the production stages of latex itself. The drying kiln was about 30

-2-

feet high and 10 feet in diameter. It was steam-heated and held at a temperature of 110 degrees centigrade. The latex moves on live rolls through the kiln and leaves it as crude rubber. The 6.8 foot-wide rubber band was cut to a width of 3.3 feet by cutting machines and wound on linen rolls. The weight of one roll was 100 kg. The thickness of the band was variable and ranged from 2 to 5 mm. The plant had a total of three drying kilns. The rubber rolls were packed in igelit, stamped with the production mark and serial number, and stored in workshop D52. Four to five thousand rolls were stored in this workshop at the time of observation. Shipments occasionally left for an unknown eastern destination. A warehouse was being built on the site of the former workshop E46 which had been dismantled. The norm of one 12-hour shift was 96 rolls. This norm could easily be exceeded. Automobile and bicycle tires were also manufactured in the plant on a small scale. Some were issued to the workmen and some were sold on the black market.

(2) Igelit was produced in workshop D47. There was only one machine for igelit production. The remaining machines had been shipped to the Soviet Union. [redacted] the igelit production process. It was used as packing material, as a substitute for window panes and as a floor covering. Igelit shoes were manufactured in the BITTERFELD (J 52/E 14) Plant. This product was also used in the manufacture of art objects (such as lamp shades). A characteristic of igelit is that it becomes soft at warm temperatures and hard and brittle at cold temperatures.

25X1A

b. Mechanical department

- (1) Manager of the mechanical shop: Chief Engineer RAUER
- (2) Foreman of the locksmith's shop: BECKMANN (SED member and chief confident of the trade union.)
- (3) Foreman of the lathe shop: DOERNING
- (4) Technical manager: Engineer WAGNER.

Machines were repaired and overhauled in the mechanical department. Small spare parts were produced. The machinery consisted of 6 old-type lathes, each with an electric motor, drilling machines, milling machines, electric welding instruments, autonomous welding installations and an electric crane of 1,500-ton (sic) load capacity. The personnel of the mechanical department numbered about seven hundred men (mostly experts).

c. The plant guard numbered about a hundred men. For six months women were also enlisted in the guard. The members of this unit were uniformed (blue uniform with green cuffs) and have not been armed since a short time ago. They were assigned to check identification papers at the main guard station, and the entrance gates and to make spot checks within the plant area. In addition to the plant guard there was a criminal department. It was mainly assigned to security matters, but also handled thefts etc.

d. Identity papers: Each workman must have a plant identity card and a Soviet pass. The plant identity card had to be produced with the supplementary Soviet pass.

(1) Plant identity card: A strong yellowish paper, 90x50 mm, in a sealed celluloid cover. Christian name and surname, residence and birth dates, and a photograph of the holder were shown on this card, it was signed by a member of the personnel department. The signature was certified by the stamp "Chemische Werke Buna" (Buna Chemical Plants).

(2) Supplementary pass: A strong red paper, 90x50 mm, with unknown Russian text. No photograph, it was impossible to enter the plant area without these identity papers. Sentries of the plant guard constantly patrolled the enclosure.

e. The plant had its own railroad station ("Buna" railroad station). It was the terminal of a branch line to the MERSEBURG (N 52/D 91) railroad station. Each plant road had spur tracks.

f. For plant layout and legend see Annex.

Comment:

The expansion of the SCHKOPAU Buna Plant is necessary for the fulfillment of the 1949 production schedule of 27,000 tons. The 1948 output was 20,000 tons.

1 Annex: Buna Plant in SCHKOPAU.

COUNTRY Germany (Russian Zone)

SUBJECT Reparations to USSR  
1 January - 31 July 1949

PLACE

25X1C ACQUIRED DATE OF INFO 

1. The reparations plan of the D.M. provides for delivery of DM 1,020,000,000 during 1949. Production orders have actually been issued for a total of DM 1,069,000,000. This report on results 1 January-31 July 1949 is based on reports from individual factories; the latter calculate prices on the basis of the 1944 stop-price plus certain approved increases. As a result the total value of reparations orders for the year as calculated by the factories is DM 1,246,000,000.

2. Reparations orders were allotted as follows:

	Million DM
	D.M. Price      Factory Price
VEB(Z) Publicly owned factories (zonal)	396      454
VEB(L)      "      "      (state)	24      28
SAGs	477      571
Other (private)	172      193
Total	1,069      1,246

3. The production quota 1 January-31 July was DM 639,000,000 at factory prices. As of 31 July results were: % of Quota

DM 658,000,000 produced	103%
DM 599,000,000 accepted by SMA	94%
DM 531,000,000 actually dispatched	83%

In addition DM 5,000,000 reparations not included in the original plan were dispatched during this period.

COMMENTS

Position No. 6  
Steam Locomotives  
40 tons

Produced 0% of Quota  
Turned Over 0% of Quota  
This quota is to be filled by Waggonbau  
Görlitz on Order No. 910268. Serious  
material difficulties have been met. The  
basic material is to be imported from Poland  
and, according to our knowledge, none has as  
yet been received.

Position No. 7  
Electric Trucks  
Winch weight  
75 tons

Produced 0% of Quota  
Turned Over 0% of Quota  
This quota, on Order No. 910080, is to be  
filled by VEB IAW Hennigsdorf. Lack of  
necessary parts is also evident here; relays  
and springs are lacking.

Position No. 8  
Electric Batteries  
for Locomotive  
Lighting System

Produced 131% of Quota  
Turned Over 131% of Quota  
After conclusion of the report, information  
was received from SAG Bleichert that 50 units,  
valued at 920 TDM, had been produced, turned  
over, and accepted. New position:  
Final Quota 130 units 1331 TDM  
Produced  
Turned Over 2669 TDM  
Accepted

Position No. 10  
Electric Motors  
to 25 kW

Produced 61% of Quota  
Turned Over 61% of Quota  
The poor performance in filling this quota  
must be traced back to the situation at the  
Elektro-Motoren Werk, Vernigerode. In com-  
parison to the previous month, the situation  
is certainly better. But there is still a  
lack of sheet metal, copper, and precision  
tools. Moreover, delivery of defective  
parts to the factory has been noted.

Position No. 11  
Electric Motors  
to 44 kW

Produced 38% of Quota  
Turned Over 38% of Quota  
This quota is also placed with the Elektro-  
Motoren Werk, Vernigerode, and has met the  
same difficulties as those described under  
Quota 10.

Position No. 16  
Direct Current  
Electric Machines  
HP 1000

Produced 60% of Quota  
Turned Over 60% of Quota  
The orders on this quota were placed with the  
Spezialwerk für Galvanotechnik in Leipzig.  
The delay in filling this quota has resulted  
from late delivery of the necessary parts.

Position No. 18  
Alternating Current  
Crane Motors

Produced 80% of Quota  
Turned Over 80% of Quota  
All three orders on this quota are placed  
with SAG Sachsenwerk, Niedersiedlitz. The  
amount set in Order No. 910084 was exceeded,  
but Order Nos. 910085 and 910086 were not  
filled due to lack of necessary parts.

\*probably 1000 kW.

## ATTACHMENT III

-3-

Position No. 19  
Direct Current  
Crane Motors

Produced 20% of Quota  
 Turned Over 20% of Quota  
 The three orders on this quota are also placed with SAG Sachsenwerk Niederschlitz. Here again difficulty has been met in getting necessary parts.

Position No. 25  
Magnetic Starting  
Switch; Size 2

Produced 100% of Quota  
 Turned Over 85% of Quota  
 After completion of report, report sheet #15 of the SAG Sachsenwerk Radeberg was received.  
 New position:

Quota 12,000 units = 1363 TDM  
 Produced 12,500 units = 1421 TDM  
 Turned Over 12,100 units = 1364 TDM  
 Accepted 7,000 units = 796 TDM

Position No. 26

Switches; Size 3

Produced 0% of Quota  
 Turned Over 0% of Quota  
 Report from SAG Sachsenwerk Radeberg received after conclusion of report P.I.  
 New position:

Quota 2,000 units = 327 TDM  
 Produced 1,500 units = 283 TDM  
 Turned Over 1,500 units = 283 TDM  
 Accepted -

(87% of Quota turned over)

Position No. 28  
Contact Points;  
Size 3

Produced 125% of Quota  
 Delivered 105% of Quota  
 Report from SAG Sachsenwerk Radeberg received after conclusion of report P.I.  
 New position:

Quota 2,600 units = 266 TDM  
 Produced 3,100 units = 341 TDM (119% of Quota)  
 Turned Over 3,000 units = 330 TDM (115% of Quota)  
 Accepted

Position No. 29  
Contact Points;  
Size 4

Produced 41% of Quota  
 Turned Over 0% of Quota  
 Report from SAG Sachsenwerk Radeberg received after conclusion of report P.I.  
 New Position:

Quota 900 units 149 TDM  
 Produced 1,000 units 166 TDM (111% of Quota)  
 Turned Over 1,000 units 166 TDM (111% of Quota)  
 Accepted 800 units 133 TDM

Position No. 36  
Steam Engines  
130 HP

Produced 76% of Quota  
 Turned Over 60% of Quota  
 Both orders on this quota are placed with the SAG Maschinenbau Duckow Wolf. The present unfavorable situation is due to lack of parts, especially pipes.

Position No. 46  
Power Transformers  
40,000 KVA

Produced 14% of Quota  
 Turned Over 14% of Quota  
 The poor position of this quota can be traced to the completely unfavorable performance of Transformatoren-und Kältzentern, Dresden, on Orders No. 801112, 801113, and 801114. On these three orders only nine transformers have been released for delivery. This poor performance has been due to shortage of parts, to the lack of malleable sheet metal and nickel and copper.

SECRET

## CENTRAL INTELLIGENCE AGENCY

## ATTACHMENT III

-4-

Position No. 47  
Transformers  
110-220 KV

Produced 66% of Quota  
 Turned Over 66% of Quota  
 The poor fulfillment of this quota is due to unsatisfactory performance on the orders placed with AMG Transformatoren-Werk Ober-Schönnewide. On Order No. 801237 the necessary porcelain from Neuhaus is still lacking.

Position No. 48  
Transformers  
0-35 KV

Produced 29% of Quota  
 Turned Over 20% of Quota  
 The poor situation here is the responsibility of Transformatoren-und Röntgenwerk Dresden in their unsatisfactory performance on Order No. 910350. For the filling of this order, necessary materials, such as porcelain and insulating cord, are still lacking.

Position No. 56  
Electric Furnaces  
For Industrial and  
Laboratory Uses

Produced 73% of Quota  
 Turned Over 73% of Quota  
 The poor performance on this quota may be traced to the SAG Siemens-Fluina in their work on Orders 801234, 801280 and 910339. The essential reason for failure to fill these orders is the lack of insulation stone-ware of high quality. The Land government of Saxony-Anhalt was given by us unconditional instructions, in writing, to see to it that this material be supplied by the Marksteinwerk Goswig.

Position No. 77  
Eccentric Rods

Produced 50% of Quota  
 Turned Over 0% of Quota  
 This quota is placed with Nagema, Maschinenfabrik, Halle, on Order No. 910105. One unit was produced in July, two more were ready the end of August, and the fourth in September. The principal material shortage is ball bearings. The necessary Western currency for the ball bearings has been provided through Nagema. We are now exerting effort to overcome further shortages of necessary parts.

Position No. 78  
Hydroelectric  
Kanonen

Produced 0% of Quota  
 Turned Over 0% of Quota  
 This quota is placed with Nagema, Maschinenfabrik on Order No. 910293. The delay in production is due principally to unsatisfactory deliveries of steel casting. We have succeeded in obtaining a part of the casting from Stahl-und Walzwerk Hennigsdorf. The production of Abstich-Kanonen is scheduled to begin in late September or early October.

Position No. 91  
Plows

Produced 0% of Quota  
 Turned Over 0% of Quota  
 The production of this quota is the responsibility of Lohr, Lokomotivbau Witten. Since these plows are being produced in this plant for the first time, the necessary equipment is, in large part, not on hand. Serious difficulties in procuring necessary parts, especially large pieces of cast steel, exist.

SECRET

## CENTRAL INTELLIGENCE AGENCY

## ATTACHMENT III

-5-

Position No. 93  
Bucket Chain Lifts

Produced 15% of Quota  
Turned Over 15% of Quota  
The poor situation on this quota is due to the unsatisfactory performance of Abus, Georg Becker, Magdeburg, on Orders No. 910520, 910444, 910475, and 910345. The delay in production can be accounted for by fundamental shortages of parts, particularly cast steel and rolled materials.

Position No. 94  
Winches  
70 HP

Produced 10% of Quota  
Turned Over 0% of Quota  
The poor situation here is the responsibility of Abus, Maschinenfabrik Nordhausen in filling Order No. 801400. In order to meet the production deadline of 57 winches in October 1949, the plants Abus, Humberg Köthen and Abus Maschinenbau Saalfeld have been called on to help in the production.

Position No. 95  
Conveyors  
3 m. drums

Produced 0% of Quota  
Turned Over 0% of Quota  
The production of this quota is the responsibility of Abus, Maschinenfabrik Nordhausen, on Orders 801419 and 910042. The preparations for filling Order No. 801419 have been carried out to such an extent that one can expect the meeting of the production deadline. On Order 910042 there are different deadlines: three units in September, three in October, and the last two in November 1949.

Position No. 109  
Ball Mills  
2700 x 3600

Produced 48% of Quota  
Turned Over 48% of Quota  
This quota is with SAG Polysius (Maschinenfabrik) on Order 910202. The original production difficulties have apparently been overcome, and it is therefore expected that there should be no further delay in the production of the third quarter.

Position No. 111  
Kugelmöhlen  
3200 x 3100

Produced 50% of Quota  
Turned Over 50% of Quota  
The filling of this quota is, for the most part, the responsibility of SAG Polysius on Order 910341. It is therefore expected that there should be no further delay in the third quarter.

Position No. 114  
Complete Equipment  
for Haulbrecher

Produced 66% of Quota  
Turned Over 55% of Quota  
Poor performance on this quota is the responsibility of SAG Krupp-Gruson in their work on Order 910020. The order may, however, be concluded in the third quarter.

Position No. 120  
Verdicker "Dorre"

Produced 53% of Quota  
Turned Over 53% of Quota  
The poor situation of this quota is due to unsatisfactory filling of Order 910263 by the firm Hoyer, Maschinen- und Apparatebau Staßfurt. Original difficulties are believed to be overcome, and it is therefore expected that the order will be filled in the third quarter.

ATTACHMENT III

Position No. 131  
Miscellaneous Roller  
Equipment

Produced 31% of Quota  
Turned Over 31% of Quota  
The poor filling of the quota is due to the unsatisfactory performance of SAG Krupp-Gruson on Order 910212.

Position No. 137  
Diamond Dies

Produced 73% of Quota  
Turned Over 65% of Quota  
The poor situation in filling this quota is due to the unsatisfactory performance of Optik, Carl Zeiss, Jena, on Order 910502. Delay in production is basically the result of an unsatisfactory number of raw diamonds having been received from the USSR.

Position No. 159  
Automatic Cranes  
for Lumber Industry

Produced 95% of Quota  
Turned Over 95% of Quota  
After conclusion of Report P.I, a notice was received from SAG Bleichert. 75 units with a value of 1,933 TDM had been further produced, turned over, and accepted.  
New level:  
Quota 160 units 4,401 TDM  
Produced  
Turned Over 160 units 4,401 TDM (100% of Quota)  
Accepted

Position No. 174  
Acid-resistant Pumps  
(30-100 m<sup>3</sup>/h)

Produced 43%  
Turned Over 35%  
Inefficiency due to insufficient deliveries from SAG Lackenson. No further difficulties expected except in delivery of motors from SAG Sachsenwerk, Niedersiedlitz.

Position No. 178  
Vertical-artesian Pumps  
(75 m<sup>3</sup>/h)

Produced 15%  
Turned Over 12%  
SAG Jäger, Leipzig, and Behauser, Leipzig; 63 units cancelled.
